FULL STACK DEVELOPER

An accomplished Full Stack Developer with over 3 years of hands-on experience in JavaScript, React JS, Node JS, and other modern web technologies. Proficient in building dynamic, responsive user interfaces and robust backend systems, with a track record of delivering high-quality, scalable applications. Demonstrated leadership in managing both frontend and backend projects, with a strong ability to collaborate across teams. Known for exceptional communication, problem-solving skills, and a commitment to continuous improvement in fast-paced, Agile environments.

SKILLS

React JS	Mongodb	Git,Github, CICD
Node JS	Next JS	Firebase
Express JS	MUI, Tailwind CSS, BootStrap	Aws

PROFESSIONAL EXPERIENCE

Almondz Global Security   **Aug 2024 - Present**

Software Development Engineer
- Contributed to the development of eKYC and backoffice projects, enhancing the user experience and optimizing system performance.
- Integrated and maintained secure digital identity verification processes for customer onboarding.
- Worked closely with backend teams to streamline data handling and improve workflows for back-office operations.
- Implemented responsive and user-friendly interfaces to ensure smooth client interactions across devices.
- Utilized technologies like React.js, Redux, and JavaScript to deliver robust and scalable solutions.
- Actively participated in Agile methodologies to ensure timely delivery of key features.

Remotestate   **Dec 2021 - July 2024**

Software Development Engineer
- Developed responsive user interface components using React.js, translating designs and wireframes into high-quality code while ensuring best practices in JavaScript.
- Enhanced front-end performance through optimization and documentation, while implementing the latest security measures and development techniques.
- Led a frontend team, improving delivery time through efficient task delegation and workflow management, while reviewing application requirements for compatibility.
- Collaborated with backend developers to design and maintain APIs, ensuring seamless integration between frontend and backend systems, and participated in unit testing and production deployment.
